PROFESSIONAL SUMMARY

Electronics and Communication Engineering student with strong foundation in Full Stack Web Development using Python, Django, Django REST Framework, React, and MySQL. Experienced in building RESTful APIs, JWT-based authentication systems, and payment-integrated applications. Strong understanding of OOP and Data Structures with interest in backend development.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Backend Development: Django, Django REST Framework, RESTful APIs

Frontend Development: React, HTML, CSS

Database: MySQL

Payment Integration: Stripe API

Concepts & Architecture: Object-Oriented Programming (OOP), MVC Architecture, MVT Architecture

Tools: Git, GitHub, Postman

EDUCATION

- **B.E. Electronics and Communication Engineering**

Sri Shakthi Institute of Engineering and Technology | 2023 – 2027 | CGPA: 7.4 / 10

- **Higher Secondary (HSC)**

MHSS Matric Higher Secondary School | 78.5%

PROJECTS

- **FinVault – Digital Wallet Application** | Python, Django, Django REST Framework, React, MySQL, JWT, Stripe API

- Developed a full-stack digital wallet application with JWT-based authentication.
- Designed RESTful APIs for deposit, withdrawal, and transaction history management.
- Integrated Stripe PaymentIntent workflow for secure payment processing.
- Implemented backend validation to ensure accurate wallet balance updates after successful transactions.
- Maintained structured transaction records in MySQL for reliable balance tracking.

- **BlogSphere – Role-Based Blogging Platform** | Python, Django, MySQL, HTML, CSS

- Developed a role-based blogging platform using Django's MVT architecture with dynamic content rendering.
- Implemented user authentication with Django's built-in authentication system and hashed password storage.
- Enforced role-based access control for Admin, Manager, Editor, and User roles.
- Built full CRUD functionality for blog creation, editing, and content management.
- Integrated MySQL for structured data storage and retrieval.

- **Academic Management System (Console-Based)** | Python, OOP, MVC Architecture, File Handling

- Developed a console-based academic management system using OOP principles and MVC architecture.
 - Implemented role-based access control for Admin and Faculty users.
 - Designed modules for student management, attendance tracking, and report generation.
 - Applied service-layer architecture to separate business logic from presentation.
 - Utilized file-based storage for persistent data management
-

CERTIFICATIONS

- Data Structures and Algorithms – Udemy
- Full Stack Web Development – Udemy
