PROFILE

Cloud & Cybersecurity Engineer with strong foundational knowledge in networking, cloud computing (AWS), and cybersecurity. Interested in building secure and scalable solutions through hands-on project experience. Continuously improving skills in cloud security and reliable system design.

EDUCATION

B.E. CSE (Cyber Security) 2027
Sri Shakthi Institute of Engineering and Technology Coimbatore, India
3rd Year | 8.28 CGPA [5 SEM]

Higher Secondary 2023
Adithya International School Coimbatore, India
Percentage - 80.2%

SSLC 2021
Adharsh Vidhyalaya Public School Coimbatore, India
Percentage - 76.6%

PROJECTS

ZeroCloud : A Modular Cloud Security Toolkit

Developed ZeroCloud, a modular multi-cloud security toolkit that performs automated misconfiguration scanning across AWS, Azure, and GCP, detects vulnerabilities in storage, IAM, network configurations, and encryption, and generates unified risk reports. Agentless architecture with a rule-based analysis engine and real-time dashboard for scalable and efficient cloud security auditing.

CloudNet Sentinel: A Modular Cloud Security Monitoring & Threat Detection Platform

Developed CloudNet Sentinel, an AWS-native cloud security tool that performs automated misconfiguration scanning, constructs attack paths using graph-based analysis (NetworkX), and generates risk scores with cost impact estimation. Designed a modular architecture with CLI support and deployed the application for real-world usability.
